## **Overview**

*Genetic counselling is the process of advising individuals and families affected by or at risk of genetic disorders to help them understand and adapt to the medical, psychological and familial implications of genetic contributions to disease.*

## **Objectives:**

- *To increase understanding of genetic diseases, disease management,*
- *To explain the risks and benefits of testing*
- *The main aim is to reduce the genetic disorders incidence and identify population groups at risk*

## **Accomplishments of Workshop**

*The participants would be able to explore the heart of the genetic counselling, professional importance, and ethics involved in the process. The workshop would enhance the professional capabilities in genetics, genomics, medical genetics or genetic counselling.*

*The medical professional and clinicians would be able to perform themselves the first level genetic counselling to couple requiring to know the risk.*

## **Features -**

- ✓ Live sessions including detailed demonstrations
- ✓ Q&A Sessions
- ✓ Certificate of Completion
- ✓ Post-training support for queries

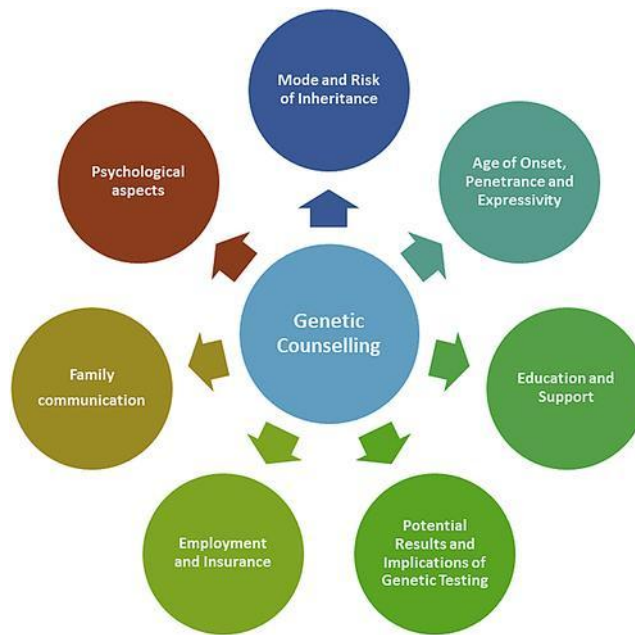

## Who should attend?

- ✓ All Science graduates or PG
- ✓ Research Scholars
- ✓ Medical Professionals
- ✓ Medical Geneticists
- ✓ Professionals

## Featured Topics:

- Genetic Counselling Concepts and Steps
- Applications and Importance in today's Genomic Era
- Role of Genetic Counselling in Population and medical genetics
- The risks and benefits of you having a genetic test
- Methods and evaluation of genetic risk
